

FEATHER & GREY  
INTERIORS

Your Complete Guide  
To  
Window Shutters

# About Us

Feather & Grey Interiors are a family-run business with over 15 years experience in the carpentry industry. Our team have worked for some of the biggest window styling companies in the country and created Feather & Grey Interiors to combine expertise in the field with high-end craftsmanship to give customers a truly great product paired with unbeatable customer service.

## Our Ethos

We only offer our customers products we would be proud to showcase in our own homes, which is why we exclusively supply FSC-certified solid hardwood shutters (and uPVC for moisture-rich environments).

We pride ourselves in a no hard-sell approach, no high-low pricing strategies and a customer-centric focus, offering expert advice and guidance to ensure our customers are 100% happy.

# Introduction to Shutters

Over the last couple of years, window shutters have grown in popularity. Their timeless, elegant style partnered with their versatility means they are the perfect window styling for almost any window in any home.

We also supply a range of colours and finishes to suit your home decor; from traditional white to natural wood to beautiful pastel shades, there is plenty of choice to find the perfect look.

# Why Choose Shutters?

## Light Control

Shutter louvres give you flexibility in how much light you allow into your room.

## Privacy

Opening and closing louvres and panels allows you to choose your level of privacy.

## Style

Shutters are stylish and versatile; a timeless addition for all homes.

## Insulation

Shutters give your home an extra layer of insulation by helping to block out unwanted drafts.

## Security

Acting as a deterrent to unwanted visitors due to their sturdier nature and functionality when opening.

# Shutter Styles

## Full Height

Full height shutters cover the entirety of the window. The operation of the louvres can be split or dividers added for versatility of privacy and light.

## Tier on Tier

Tier on tier shutters have independent panels top and bottom that are able to operate separately, giving you flexibility on privacy and light.

## Cafe-style

Cafe height shutters typically cover the bottom section of your windows, allowing for maximum light, whilst at the same time giving you privacy on the bottom. .

## Tracked

Tracked shutters are great for large windows such as patio or bifold doors, sliding on track and allowing quick and easy access through your doors.

## Shaped

Shaped shutters are perfect for ornate windows and doors. These include circles, arches, triangles, ovals and many more.

## Solid Panel

Solid panel shutters are a solid wooden panel covering the entirety of the window. Typically used in bedrooms where maximum light restriction is needed.

# Our Materials

## Solid Hardwood

We have sourced the best quality solid hardwood for our shutters to ensure we are giving our customers the most superior product on the market. Skilfully crafted, built to last and expertly installed, our shutters are designed to be the perfect addition to your home.

Sustainably sourced and FSC-certified, the sourcing of our solid hardwood is also kind to the environment.

## UPVC

Specifically designed for moisture-rich environments such as kitchens, bathrooms and wet-rooms, our sustainably sourced uPVC shutters are completely waterproof and the perfect solution for these rooms.

We can match the design and colour to your other solid hardwood shutters to ensure a seamless look throughout your home.

# Personalise for your home

## Louvre size

Choosing your louvres is a personal choice and will usually depend on the size of your windows and the overall look you wish to achieve.

Our louvres come in 47mm, 63mm, 76mm, 89mm and 114mm.

## Hinges

Hinges are aesthetically an important element. We have a range of hinge colour options to choose from to match your interiors.

We also offer a hidden hinge option which means that your hinges are not visible. A popular option if you want a completely smooth finish.

## Mechanism

We do a range of different mechanism options to help operate your shutters. These are:

- Hidden mechanism
- Clearview
- Tilt rod
- Off-centre tilt rod

# Colours

## Colour Collection

# Wood Stains

## Custom Colour Match
